

Private VPN: A Manifesto for Freedom

Privacy is not a feature – it's your right.

→ This is not a product. This is a principle.

We don't log, track, or store your data. We don't even know your name.

You receive a device you can fully trust – it's yours, and under your control.

What you get:

- A personal VPN server (Ubuntu + WireGuard)
- No clouds, no third parties
- Physical device in your hands
- No usernames, no passwords – just your private key

How it works:

1. Contact us via a secure channel
2. Receive your VPN server
3. Plug it in, use it, and enjoy peace of mind

Legal status:

We do not provide VPN services – we provide hardware.

Full control and responsibility is in your hands.
