

PRIVACY PRINCIPLES AND OUR COMMITMENT TO TRUST

We are not a company chasing profit. We are people pursuing privacy.

We are not service providers. We are reclaimers of control.

We don't believe in marketing. We believe in action.

INDEPENDENT FROM LEGAL PRESSURE

- We do not store your data. Even if someone demanded it - we simply don't have it.
- We do not manage your server, so nobody can "connect" or "peek" without your knowledge.
- We have no user database - there's nothing to track or leak.

If you have nothing to hand over - nothing can be taken from you.

WE DON'T SIGN ORDERS - WE SIGN RESPONSIBILITY

- We are not a VPN provider.
- We do not use cloud servers, logs, or third-party APIs.
- We are not affiliated with any corporate or government entities.

Our promise is simple: we give you what we would give ourselves.

WHY YOU CAN TRUST US

- Everything we build is auditable - no black boxes.

- Nothing runs in the background. Everything is in plain sight.
- Even under pressure - we have nothing to show.

TRUST IS BORN NOT FROM WORDS - BUT FROM ARCHITECTURE.

AND OUR ARCHITECTURE SAYS: YOU ARE THE OWNER. COMPLETELY.
